

STRUCTURA DAVID CARL PUZEY 081-005470 SPRINGFIELD ILLINOIS

Dimensions have been converted from existing metric plans. The Contractor shall field verify all measurements prior to ordering

GENERAL NOTES All structural steel shall conform to AASHTO Classification M-270 Gr. 50.

Fasteners shall be high strength bolts. Bolts 78"\$, open holes 1516"\$,

Diaphragm connection holes shall be 15/16 "If for 34" bolts. Two hardened

Plan dimensions and details relative to existing plans are subject to nominal construction variations. The Contractor shall field verify existing dimensions and details affecting new construction and make necessary approved adjustments prior to construction or ordering of materials. Such variations shall not be cause for additional compensation for a change in scope of the work, however, the

Contractor will be paid for the quantity actually furnished at the unit price bid

Existing structural steel that will be in contact with new structural steel shall be cleaned and painted prior to erection as required by the Special Provision "Cleaning and Pointing Contact Surface Areas of Existing Steel Structures". Load carrying components designated "NTR" shall conform to the

The Organic Zinc Rich Primer/Epaxy/Urethane paint system shall be used for painting of new structural steel except where otherwise noted. The entire

system shall be shop applied, with the exception that the exterior surfaces and

bottom of the bottom flange of the fascia beams, masked off connection surfaces,

and field installed fasteners, all of which shall be touched up and finish coated in

the field. The color of the final finish coat for all steel surfaces shall be gray. Munsell No. 5B 7/1. See Special Provision for "Cleaning and Painting New Metal

Calculated weight of Structural Steel = 12.140 lbs.

washers shall be required at diaphragm connections.

Supplemental Requirements for Notch Toughness, Zone 2.

unless otherwise noted.

unless otherwise noted.
